## Corporate Security and Risk Avoidance: Protecting Your Company's Assets

Presented by  
Charles Washington, CFE, CICA, CPP  
Pfizer

Have you ever stopped to consider that corporate security is more than the officers who ensure that you and your colleagues are authorized to enter the premises, or more than the staff that come to your aid when you are in distress in the workplace?

From security management to anti-counterfeiting to information security to anti-fraud, corporate security professionals protect all the assets of your company, so that you can do what you do best – save lives!

This interesting look at an important topic is brought to us by noted security expert Charles Washington, Director, Fraud Investigation Group, Pfizer. Charles will provide an insight into corporate security from a perspective that rarely is encountered.

Attendees will see how fraud could affect 10% of all the revenue coming into your company and will learn why counterfeiting has practically become the crime of the century. You'll also hear more on how counterfeit drugs pose a significant risk to public health and safety and find out what the pharmaceutical industry is doing in the fight over the abuse of prescription drugs in the marketplace. This will be an interactive workshop where attendees will explore the values of developing collaborative relationships with corporate security and leverage those relationships to achieve their own compliance objectives.
