Everything You Always Wanted to Know About DEA ARCOS Data ... But Were Afraid to Ask!

Presented By:

Lisa Butler
Novartis

Joe Tomkiewicz
Teva

Maybe the acronym “ARCOS” is part of your workday language. Or perhaps it’s just one of those things you have heard in passing and thought you should know more about.

Whatever your level of ARCOS knowledge may be, our two experienced presenters are well-versed in DEA knowledge and well-equipped to discuss how to best utilize ARCOS data to help minimize risk to companies.

The DEA’s Automation of Reports and Consolidated Order System (ARCOS) is an automated, comprehensive drug reporting system that monitors the flow of DEA controlled substances from their point of manufacture through commercial distribution channels to point of sale or distribution at the dispensing/retail level-hospitals, retail pharmacies, practitioners, mid-level practitioners, and teaching institutions. The DEA requires that manufacturers and distributors review ARCOS retail buyer statistics before shipping any controlled substance.

This workshop will highlight some critical techniques to help you best understand and utilize ARCOS data to reduce your company’s risk. Whether you need to have this information now, or you want to be ready just in case, you’ll be glad you attended this very informative learning session.
