

Workshop Announcement

DSCSA! Drug Supply Chain Security ACT, or AGGRAVATION?

Presented by:

Brad King

Sr. Manager, Regulatory & Healthcare Compliance, PDMA/DEA/Agg Spend/Drug Price/Drug Take Back/Licensing/Reporting, Kowa Pharmaceuticals America, Inc.

A compliant and secure pharmaceutical supply chain is not only essential to operate, but most importantly required to ensure patient safety. The Drug Supply Chain Security Act (DSCSA) enacted by Congress on November 27, 2013, created a road map for the supply chain to follow. While industry is still in the final stabilization phase, closely approaching are the final phases to completion and full FDA enforcement. All stakeholders in the supply chain have been impacted by this rigorous and costly process and must comply to continue operations and provide lifesaving medications to patients and combat drug shortages.

In this workshop presentation, industry expert Brad King, who has been on a DSCSA Serialization Project Team since 2014 to date, is well prepared to share his extensive knowledge on this topic with you. Attendees will get an overview of the phase in periods for Manufacturers, Repackagers, Wholesalers, 3PLs and Dispensers along with current challenges faced by industry during the stabilization period in meeting the enforcement requirement deadline which was [originally scheduled for November 27, 2023, the implementation of core requirements has now been postponed to November 27, 2024](#). Areas such as audits and enforcement by FDA and State Board of Pharmacies will also be covered.

Join your industry peers in this new workshop that will get you up to date on DSCSA and provide you with some valuable information to bring back to your organization.
