

Workshop Announcement!

Cold Chain Green Shipping Options/Direct to Practitioner

Presented by:

Alison Crawley
Global Sustainability Manager
ThermoSafe

Chris Dotta
Sr. Account Manager
ThermoSafe

The environmental regulations governing our industry play a crucial role in protecting public health, securing hazardous materials, and safeguarding our planet from the potentially harmful effects of pharmaceutical waste. These regulations extend to our shipping practices, emphasizing the need for sustainable solutions that minimize waste across operations.

Join our expert-led workshop to explore practical strategies and innovative solutions to ensure your shipping operations align with environmental regulations. During the session, we'll cover key topics including:

- Defining what it means to be "green" and "sustainable" in our industry
- Sustainable shipping practices and optimal shipping conditions
- Implementing recyclable shipping materials in your operations
- Warehousing innovations for efficient pick/pack/ship processes

Let's drive meaningful change and contribute to a more sustainable future. See you there!
